### **Chemistry Lab At North Campus---**

Thanks to the efforts of Jane Gant and Clare Bailey, North Campus has a new Chemistry Lab which consists of fourteen IBM Model 55SX Personal System 2's and seven Pioneer 4200 Laserdisc Players. Seven of the Model 55SX's are equipped with the Mmotion adapter card. This enables the Personal System 2 to display chemistry experiments on the computer screen in full motion and color.

The new Chemistry Lab is using award winning chemistry software written by Stan Smith. The lab is located in room A114.
